

Doptic - Creative Digital Agency React Template

Doptic is a visually captivating, high-performance React template designed for digital agencies, creative studios, portfolios, and startups. Built with **React 18**, **Vite**, and **Tailwind CSS**, it features premium **GSAP** animations, magnetic interactions, and a fully responsive layout that guarantees a stunning user experience across all devices.

Whether you are a developer looking for a robust foundation or an agency wanting a standout website, Doptic provides the perfect blend of aesthetics and functionality.

Key Features

- **Premium Animations:** Powered by **GSAP** and **Framer Motion** for award-winning visual effects.
- **High Performance:** Built on **Vite** for lightning-fast HMR and optimized production builds.
- **Modern Styling:** Utility-first styling with **Tailwind CSS**.
- **Smooth Scrolling:** Integrated **Lenis** for buttery smooth scroll experiences.
- **Interactive UI:** Custom **Magnetic Cursor**, sticky elements, and hover effects.
- **Fully Responsive:** Mobile-first approach ensuring perfect display on desktops, tablets, and phones.
- **Dynamic Components:**
 - Animated Preloader with text reveal.
 - Diagonal Infinite Marquees.
 - Full-screen Overlay Navigation.
 - Interactive Image Reveals.
- **Clean Code:** Modular component structure with clear documentation.
- **SEO Friendly:** Semantic HTML structure and optimized assets.

Pages Included

Doptic comes with a variety of pre-built pages to jumpstart your project:

- **Home:** [index.html](#) (Hero, Services, Portfolio, Reviews, FAQ)
- **About Us:** [/about](#) (Agency Info, Awards, Partners)
- **Services:** [/services](#) (Detailed service listings)

- **Projects:**
 - Portfolio Grid: `/projects`
 - Project Details: `/projects/project_details_01` (Multiple variations supported)
- **Team:**
 - Main Team: `/team`
 - Design Team: `/design_team`
- **Blog:**
 - Blog Grid: `/blog`
 - Blog Standard: `/blogstandard02`
 - Blog Post: `/blogpost01`
- **Contact:** `/contact01` (with functional form layout and map)
- **Utility:** 404 Not Found

Technology Stack

- **Framework:** React 18 (`^18.3.1`)
- **Build Tool:** Vite (`^5.4.10`)
- **Styling:** Tailwind CSS (`^3.4.19`) & Tailwind Merge
- **Animation:** GSAP (`^3.12.5`), Framer Motion (`^12.23.25`)
- **Routing:** React Router DOM (`^7.10.1`)
- **Icons:** React Icons (`^5.3.0`), Lucide React
- **Maps:** React Leaflet (`^4.2.1`)
- **Scrolling:** Lenis (`^1.3.17`)

Installation Guide

Follow these steps to set up the project on your local machine.

Prerequisites

Ensure you have **Node.js** (v16 or higher) installed.

1. Unzip and Install

Extract the downloaded package and open your terminal in the project directory.

Bash

```
# Install dependencies
```

```
npm install
```

2. Start Development Server

Run the local development server with hot-reload.

```
Bash
npm run dev
```

The site will be available at <http://localhost:5173>.

3. Build for Production

Create an optimized production build.

```
Bash
npm run build
```

Modifying Animations

Animations are handled via GSAP hooks located in [src/hooks/useGsapAnimations.js](#).
You can tweak duration, ease, and triggers directly in the component files.
